The Best Defense is a Strong Preference

Industrial and Institutional Skin and Surface Disinfection

Skin and Hands – Whether you work in a large hospital, institutional or in a manufacturing setting, common areas like waiting rooms, ER suites Intensive Care Units, restrooms, locker rooms, conference rooms, and offices provide ample opportunity to harbor germs that can make you sick. Prefense foam hand sanitizer is an alcohol-free solution that is perfect to keep in easy access to doctors and nurses, caregivers and intended for everyday and repeated use.

Surfaces – Prefense Surface Shield is an alcohol-free solution designed to keep common areas germ-free and sanitary for up to 28 days. The solution works for up to 90 days on mold and mildew. Locker rooms, carpet, floors garments, counters, furniture, support equipment, waste and trash containers all can be treated to reduce the spread of pathogens that contribute to the spread of disease and foul odors in many workplace environments.

Maintenance – Add Prefense surface protectant to your master sanitation program. Because of the persistence of this product, it gives you protection over time, allowing you do more with limited resources. To treat items, dip soak, or spray, and allow to fully dry.

Industry Testimonials

“As an RN, I never liked using the hand sanitizers as they would dry out my skin & smell of chemicals. Soap & water was always good enough for me...until I was introduced to Prefense. I also found it surprising to know that many are unaware of the ineffectiveness associated with alcohol based sanitizers. They only work when they're wet. Once the alcohol dissipates; it's no longer effective. With Prefense, I am assured of the best protection and my skin remains moisturized!

Think about it...to be able to don invisible gloves while, unknowingly, coming into contact with bacterium and not having it penetrate into my skin OR transfer the bacterium onto anyone or anything else is one of the best and affordable insurance policies I can have”. - Shawn-Kristin, RN
